

Management is committed to provide the best value proposition to our customers, as for design and manufacturing of naval machinery, in both domestic and international markets.

For this reason, the Management has established an Integrated System of Quality, Environmental and Health & Safety Management according to the reference standards UNE-EN-ISO 9001:2015 and 14001:2015 and ISO 45001:2018 with the objectives of:

- Ensuring compliance with the requirements determined by our customers, legal requirements and any others that our organization signs in relation to our environmental matters and hazards to safety and health at work.
- Continually improving the service offered to our customers, as well as optimizing the time and processes when implementing it.
- Providing the Technical Department with the most efficient design resources.
- Providing the Quality Control Department with the necessary resources to ensure the delivery of a fully tested machinery that complies with the specifications required by the customer.
- Guaranteeing a continuous improvement of the efficiency of our Quality, Environmental and Health & Safety Management System.
- Keeping us at the technological forefront through the development of R&D&I projects, in both products and processes, incorporating environmental factors in its planning.
- Establishing a commitment to prevent pollution and an appropriate waste management.
- Establish a commitment to prevent injuries and deterioration of health, providing safe and healthy working conditions.
- Establish a commitment to eliminate hazards and reduce risks related to occupational safety and health.
- Provide each employee's training and information, as well as the means of involvement and consultation, to develop their work safely.
- Incorporating our collaborators to this commitment with quality and environmental management to prevent failures from occurring and to facilitate compliance with the Management System.

The Management assumes the responsibility of allocating the necessary resources for each one of the areas in order to attain the established objectives, and communicating the Quality, Environmental and Health & Safety Management policy at all levels of the Organization, aiming to encourage greater involvement of the staff.

ROBERTO RODRÍGUEZ ORRO
Director General
